> We use [semantic commit messages](https://github.com/electron/electron/blob

>

> Examples of commit messages with semantic prefixes:

>

> \* `fix: don't overwrite preventDefault if default wasn't prevented`

> \* `feat: add app.isPackaged() method`

> \* `docs: app.isDefaultProtocolClient is now available on Linux`

>

> Things that will help get your PR across the finish line:

>

> \* Follow the JavaScript, C++, and Python [coding style](https://github.com

> \* Run `npm run lint` locally to catch formatting errors earlier.

> \* Document any user-facing changes you've made following the [documentat

> \* Include tests when adding/changing behavior.

> \* Include screenshots and animated GIFs whenever possible.

>

> We get a lot of pull requests on this repo, so please be patient and we \
